

Compression... Without Exception

Burton Corblin® Process Compressors from Gas and Air Systems

When you specify a compressor to API 618, you expect the high reliability achieved by compliance with the Standard.

Gas and Air Systems' Burton Corblin® Compressor packages include the following important features required by API 618...without exception.

- Water-cooled, horizontal cylinders.
- Replaceable dry cylinder liners.

- Two-compartment, full-stroke distance pieces.
- Buffer-purged packing cases.
- Conservative design and ratings.

API 618 demands it... you expect it, and we provide it...without exception.

Contact Gas and Air Systems for the process compressor built to your standard.

If you require low-volume and/or high-pressure compression of hazardous gas with zero leakage and zero contamination, Gas and Air Systems' Burton Corblin® Diaphragm Compressors will meet your specification...without exception.
